Detailed Reviewer's Report

- The figure titled *"Architectural plans and 3D view of the building model under study"* on page 2 is not properly cited in the manuscript text. The authors should assign it a proper figure number and provide a complete caption. Furthermore, the figure must be explicitly referred to in the relevant paragraph of the main text.
- All figures in the manuscript should have sequential figure numbers, descriptive captions and appropriate in-text citations. No figure should appear without being referred to in the main text.
- Figures 1–12 should be carefully reviewed for readability and presentation quality. In particular, the text and legends in Figures 5-10 are relatively small and difficult to read. The authors should improve the resolution, font size, axis labels and legends.
- The authors should verify all references and ensure consistency between in-text citations and the reference list. Equations, mathematical symbols, subscripts and superscripts should be formatted properly. The manuscript also contains several typographical and formatting errors that require correction.
