Reviewer's Comment for Publication.

The manuscript addresses an important and relevant topic and provides a comprehensive overview of sustainable livestock farming, covering animal health, nutrition, biosecurity, welfare, environmental management, technology, and economic sustainability. The manuscript is generally well structured and clearly presented. Minor revisions are recommended to strengthen the critical synthesis of the existing literature, update and standardize the references, and improve the integration of supporting citations throughout the text. Some repetitive statements may also be streamlined. With these minor revisions, the manuscript may be considered for publication.
