Clarity		Good		
Significance	Excellent			

Detailed Reviewer's Report

- 1. The First British Modern Medical Training Institute is generally considered to be The London Hospital Medical College, founded in 1785 by Sir William Blizard and James Maddocks. It was established as the first purpose-built medical school in England, aimed at improving health in London's East End and pioneering a combination of theoretical teaching and clinical "ward-walking"**
- 2. The Native Medical Institution (NMI) in Calcutta, established in the early 19th century, was a pivotal colonial-era institution aimed at training Indian doctors in Western medicine using vernacular languages like Urdu, Persian, and Hindi. Led by Dr. John Tytler, it fostered a hybrid approach to medicine before being replaced by the English-focused Calcutta Medical College in the 1830s.**
- 3. The 18th and 19th Centuries: Vaccination, Germ Theory, and Surgical Advances. The 18th and 19th centuries witnessed rapid advances in medical science, driven by innovations in vaccination, microbiology, and surgery. This period marked the beginning of modern medicine as we know it.**
- 4. The Indian Health Service (IHS) began on July 1, 1955, a year after the transfer of Native American health services from the Bureau of**

REVIEWER'S REPORT

Indian Affairs (BIA) to the Public Health Service (PHS). However, IHS publications appeared with greater frequency in the 1970s and 1980s.

- 5. The IHS is today assisted in its duties by other government agencies of the PHS, such as the National Institutes of Health (NIH). NIH agencies represented here are the National Institute on Drug Abuse (NIDA) and the National Institute of Arthritis and Musculoskeletal and Skin Diseases (NIAMS).**
- 6. IHS Towers Plc is a telecommunication infrastructure service provider in Nigeria. It is one of the largest independently-owned telecommunication tower operators in the world. The company is involved in network construction, network operations and maintenance and colocation services.**
- 7. Key words must be given.**
- 8. There is no proper way to publish the paper. Only given theoretical way.**
- 9. Significant points are given. It Should be made with abstract, introduction, review of literature, result with tables and graphs, discussion, summary, conclusion, references with alphabetical order.**
- 10. After those changes can be published in your journal.**
