Detailed Reviewer's Report

Short Review Report

The manuscript titled “**Élevage de l'âne (Equus asinus): Généralités, Rôles, Défis de l'heure et Perspectives**” presents a literature-based overview of donkey farming, including its origin, breeding systems, socio-economic roles, and current challenges. The paper highlights the importance of donkeys in many regions, particularly in Africa, and discusses issues related to health, welfare, and the growing demand for donkey skins.

The topic is relevant and provides useful background information on donkey production systems and their socio-economic significance. However, the manuscript would benefit from clearer structure, improved language clarity, and more recent references to strengthen the discussion.

Overall, the paper offers valuable insights and can be considered for publication after minor revisions.
