Detailed Reviewer's Report

The work is detailed and explained well enough. The title is relevant and framed properly. It consists of decent citations and is well structured.

Suggestions for Author- Author should keep in mind while writing such research papers or articles not to gather so much information at one place only. For example: Big paragraphs could have been broken down into 2 or 3 paragraphs. This will engage readers and help them gather and process the information provided. This would not let them lose interest and make the content more interesting. This way people tend to read the full paper and then analyze it.
