Detailed Reviewer's Report

The manuscript titled "Evaluating the Economic Performance and Challenges of Jammu and Kashmir's Handicraft Sector: An Overview of Post-2020 Handicraft Sector Dynamics" presents a well-structured and relevant study focusing on an important regional industry. The paper effectively combines descriptive and analytical approaches, supported by secondary data and the application of statistical tools such as growth rates, coefficient of variation, and correlation analysis. The discussion on export trends, employment patterns, and the role of policy interventions such as GI tagging and artisan support schemes adds practical value to the study. The inclusion of recent data and a clear linkage between economic performance and policy measures strengthens the overall contribution of the manuscript.

However, the manuscript would benefit from minor revisions to enhance its clarity and presentation. There are some issues related to language, grammar, and formatting that need careful editing. Certain sections, particularly the analysis and policy recommendations, are somewhat lengthy and could be made more concise and focused. Additionally, consistency in referencing style and presentation of tables and formulas should be improved for better readability. Addressing these minor concerns will significantly improve the quality of the manuscript. Therefore, the paper is recommended for acceptance after minor revision.
