Detailed Reviewer's Report

Reviewer Comment

- The study addresses a relevant and important topic in nursing practice, and the findings show improvement in knowledge among staff nurses after the structured teaching program.
- The data presentation is clear and easy to understand.

Major Issues

- The methodology section lacks key details such as ethical approval, informed consent, and clear description of the intervention and data collection process.
- Information regarding validity and reliability of the tool is insufficient.
- Statistical analysis is basic and requires clearer explanation.

Minor Issues

- Language and grammar errors are present throughout the manuscript.
- Formatting needs improvement.

Recommendation

- Major revision required before the manuscript can be considered for publication.
