### *Detailed Reviewer's Report*

*The Research Paper titled "Art and Architecture of the Rashtrakuta Dynasty", is a significant study conducted with much clarity. The technical aspects have been performed well and reflects in paper thus enhancing the quality of work. The pictures help in understanding the art and work better while helping in understanding the art through visualisation and differentiating from other art work. However, a more detatiled study and analysis would have enhanced the quality of paper, and the citations could have been increased. A quick read on the topic and going through the existing literature would help understanding the gap and realising what you are repeating yet the paper is well explained and has good flow making it feasible to understand properly for anyone.*
