Detailed Reviewer's Report

First of all the title is much relevant with respect to Viksit bharat mission. And also the study is quiet impressive for the growth model of Odisha.

but there is a need to add some points to make this study more authenticate and effective.

1. As in the research methodology part some tools has been mentioned such as Correlation, Chi square and Regression but the tools application , there standard and accepted or rejected values are absent in findings and interpretations.
2. In Interpretation part: Hypothesis verification can be done on above tools value based which is missing.
3. Graphical or tabular data representation of responses shows more suitable for analysis and for readers. (its optional)
4. In some part specially in 3 point need and significance of study the plagiarism percentage is high as per online plagiarism checker so that can be cross check.
