Detailed Reviewer's Report

It is a very well-organised community-based research that has specific aims and objectives and appropriate design both for description and analysis. It explains the research methodology very well and helps ensure the validity of the findings. Moreover, the results are properly discussed while comparing them with relevant literature. However, there could be a need for a couple of changes such as consistency in citation format, elimination of repetition in some statements and proper alignment of tables and figures in relation to the text.

Recommended after minor revisions.
