## REVIEWER'S REPORT

Manuscript No.: IJAR-57509

Title: Therapeutic Outcome of Arsenicum Album 0/3 in Chronic Dermatitis: A Case Report.

### Recommendation:

- Accept as it is .....
- Accept after minor revision.....
- Accept after major revision .....
- Do not accept (*Reasons below*) .....

Rating	Excel.	Good	Fair	Poor
Originality		Good		
Techn. Quality	Excellent			
Clarity		Good		
Significance	Excellent			

Reviewer's ID: Dr. Sumathi

### Detailed Reviewer's Report

1. **Homoeopathy (or homeopathy) is a 200-year-old alternative medicine system based on the principles of "like cures like" (treating symptoms with substances that cause similar symptoms in healthy people) and the "law of minimum dose," where high dilution is believed to increase potency. It was developed by Samuel Hahnemann in 1796. While popular in some regions, it is considered a pseudoscience with little evidence of effectiveness.**
2. **Homoeopathy (or homeopathy) is a 200-year-old system of alternative medicine, developed by Samuel Hahnemann in the late 18th century, based on the principle of "like cures like"—the belief that a substance causing symptoms in a healthy person can cure similar symptoms in a sick person. It involves highly diluted natural substances (plants, minerals, animals) meant to stimulate the body's self-healing.**
3. **Dermatitis is a common, non-contagious term for skin inflammation, resulting in red, itchy, dry, or blistered skin caused by genetics, immune system dysfunction, infections, or environmental triggers. It includes forms like atopic dermatitis (eczema), contact dermatitis, and seborrheic dermatitis. Treatments focus on soothing irritation via moisturizers, topical steroids, and identifying triggers.**

**REVIEWER'S REPORT**

- 4. Dermatitis is a common, non-contagious term for skin inflammation, resulting in itchy, red, dry, or blistered skin. Triggered by allergies, immune system issues, or irritants, it is often managed, but not always cured, with medicated creams, lifestyle changes, and proper skin care, often labeled as eczema.**
- 5. "Short duration" refers to a brief period, typically lasting a few years in finance (1–5 years for bonds) or moments/minutes in operational contexts. It implies lower sensitivity to interest rate changes, reduced volatility, and faster repayment of principal, making it a defensive, liquid investment strategy.**
- 6. *Arsenicum album* (arsenic trioxide) is a homeopathic remedy used to treat symptoms like diarrhea, vomiting, food poisoning, and anxiety-driven restlessness, especially when accompanied by extreme exhaustion. It is highly diluted, typically to 30C or 200C potencies, making it safe from arsenic poisoning.**
- 7. Arsenicum album is a homeopathic remedy derived from arsenic trioxide, used primarily for symptoms of acute anxiety, restlessness, food poisoning, diarrhea, vomiting, and respiratory issues. It is highly diluted (potentiated) according to homeopathic principles, meaning very little or no physical arsenic remains in the final, common 30C or 6C formulations.**
- 8. Therapeutic outcomes are the measurable changes in a patient's physical, mental, or social condition resulting from treatment, aimed at improving well-being, reducing symptoms, or restoring function. Success is driven by the therapeutic alliance, client engagement, and tailored techniques, with common goals including symptom reduction and improved daily functioning.**
- 9. A therapeutic outcome is the change in a patient's physical, mental, or emotional condition resulting from a treatment, intervention, or care plan. It measures the effectiveness of therapy by evaluating improvements in health, such as symptom reduction, functional recovery, or enhanced well-being.**
- 10. Key words are given excellent**
- 11. Research topic is medicinally very valued one.**
- 12. Result part can be given tables with graphs for values.**
- 13. Flow chart of significant points are good.**
- 14. Summary points also be added.**

## REVIEWER'S REPORT

15. References are not sufficient. It should be added more with discussion points.
16. References should be with alphabetical order.
17. After those changes good to publish in your journal.
