Detailed Reviewer's Report

Strengths-

The manuscript addresses a relevant and timely topic and the objectives, methodology, results and conclusion are generally well aligned. The findings are useful and support the need for improved cyber law education among students. However, **minor revisions** are recommended to improve language clarity, correct grammatical and formatting errors, resolve inconsistencies in the methodology (population and sample description), remove repetitive content and clarify Objective 5, as no analysis of demographic relationships is presented.

Accept after minor revisions.
