Detailed Reviewer's Report

- Schizophrenia is a chronic brain disorder characterized by hallucinations, delusions, and disorganized thinking. It typically begins in late adolescence or early adulthood and affects how a person thinks, feels, and behaves.**
- Morocco is a wonderful, highly family-friendly destination known for its warm hospitality toward children, vibrant culture, and diverse landscapes ranging from bustling markets to quiet beaches.**
- Mental illness refers to health conditions that disrupt a person's thinking, mood, and behavior, such as anxiety disorders, depression, and bipolar disorder. These common medical conditions cause distress or trouble with daily functioning, but they are treatable with proper care.**
- The return to old symptoms, illness, or behaviors—such as substance use—after a period of improvement or recovery. It is often a gradual process rather than a single sudden event.**
- Living with schizophrenia profoundly affects the entire family, creating objective caregiving tasks and deep emotional stress. Key**

REVIEWER'S REPORT

impacts include caregiver burden, changing household dynamics, and improved outcomes through structured support.

6. A distinctive pattern of interactions, behaviors, or relationships within a specific system. It describes how contrasting parts connect, adapt, and drive continuous change in a way that is singular and unrepeatable.
7. Family life with schizophrenia involves navigating chronic caregiving demands, shifting emotional dynamics, and significant daily adjustments for both the patient and their relatives. It shapes home routines, communication styles, and overall well-being.
8. A relapse is when a person or thing falls back into a worse state, illness, or bad habit after a period of improvement. It most commonly describes a return of a medical disease, a return to drug or alcohol use after a period of sobriety, or a return to old negative behaviors.
9. Key words can be given more.
10. Result part should be clear with tables and graphs for values.
11. Summary points also be included.
12. Some relevant pictures can be given.
13. After those changes can be published in your journal.
