Detailed Reviewer's Report

- **Keywords:** Add appropriate keywords
- Several sentences are unnecessarily long and should be divided for readability.
- There are visible language/editing problems, including missing spaces in citations such as “et al.have,” and some corrupted text around the digital-twin section. These require careful proofreading.
- The authors should carefully verify all references, DOI information, journal names, volume/issue/page details and citation-reference matching. The reference list should be checked for consistency.
