Detailed Reviewer's Report

The manuscript looks more based on article writing pattern and not as a research paper. There is absence of complete research methodology framework which could possibly include if applicable; research methodology, research gaps, research questions, literature review among other things. Even no data has been derived or given to understand the existing situations on which the topic is based. The topic claims “as a reference for Malaysian students of Islamic studies in Morocco” but no reference has been made to them in the content other than the abstract. The abstract does not justify the whole content. Other than this the paper should be revised considering other things as well which include referring the literature as well and taking guidance on how to structure it better.
