Detailed Reviewer's Report

- There are numerous grammatical and typographical errors, ”
- Avoid repeated statements.
 - The terminology “**RRR**” should be defined clearly at its first occurrence and used consistently thereafter.
 - The manuscript should use consistent capitalization, spacing, hyphenation and formatting throughout.
 - References are very limited. The reference section currently contains only a few books/web resources. More recent peer-reviewed literature should be incorporated.
- Web references should include complete bibliographic information and access dates where appropriate. Important quantitative claims should preferably be supported by authoritative scientific or institutional references.
 - The manuscript should distinguish clearly between **observed/measured results**, **calculated results**, and **expected potential benefits**.
 - The conclusion should focus on the demonstrated findings rather than repeating broad claims of potentiality.
