Reviewer's Comment for Publication.

The manuscript presents a relevant and comprehensive framework integrating ISO 9001, ISO 14001, ISO 45001 and ISO 22000 with data analytics, predictive risk management and sustainable operational excellence in the Saudi context. The proposed six-layer governance framework is well structured and appropriately emphasizes human accountability, data quality, privacy, cybersecurity and continuous assurance. Minor revisions are recommended to improve grammar and sentence structure, correct typographical and wording inconsistencies, standardize terminology, improve the formatting of tables and figures, and ensure consistency between in-text citations and the reference list. These minor improvements will enhance the clarity and overall presentation of the manuscript.
