Detailed Reviewer's Report

- The wind-rose figure on page 5 contains several individual monthly plots. The authors should improve the **font size, axis labels and readability** for publication-quality presentation.
- Figure 2 should have larger labels and a clearer legend. The three extrapolation methods should be easily distinguishable.
- Figure 3 is useful, but the authors should clearly indicate whether all values are based on the **Justus method**, as stated in Table 4. 6ac75edae5909_IJAR-59395-sample...
- Tables 2–4 should be checked for consistent decimal places and units.
- Please verify all references, DOI information and bibliographic details.
