Reviewer's Comment for Publication.

The manuscript addresses an important topic concerning commercial fleet utilization and revenue optimization in Saudi Arabia. The proposed economic framework is relevant and offers useful insights into forecasting, fleet productivity, backhaul recovery, and investment decisions. However, minor revisions are required to correct grammatical errors, improve academic language, and address formatting inconsistencies. The equations, figures, and references should also be carefully checked for accuracy and presentation. Overall, the manuscript has potential and may be suitable for publication after minor revision.
