REVIEWER'S REPORT

Manuscript No.: IJAR-59834

Title: Powering the Mountains with the Sun.

Recommendation:

Accept as it is .....

Accept after minor revision.....

Accept after major revision √.....

Do not accept (*Reasons below*) .....

Rating	Excel.	Good	Fair	Poor
Originality		√		
Techn. Quality			√	
Clarity				√
Significance		√		

Reviewer's Name: DR. PRITI GUPTA

Detailed Reviewer's Report

14. **Results and discussion:** The discussion should be strengthened by comparing the findings with previous studies and explaining the practical implications of the results. The discussion should not merely repeat the numerical values presented in the tables.

15. **Literature review:** The literature review should be strengthened with more critical synthesis. The authors should identify the limitations of existing studies and explain how the present case study addresses those limitations.

16. **References verification:** The references should be carefully checked for accuracy, completeness, publication details, DOI validity, and consistency with the citations in the manuscript. Particular attention should be given to recently published references.

17. **Figures and tables:** All figures and tables should be clearly labelled, properly numbered, cited within the text, and accompanied by informative captions. The readability and quality of figures should be improved.

18. **Language and presentation:** The manuscript contains several grammatical errors, awkward sentence constructions, inconsistent formatting, typographical errors, and incorrect punctuation. Thorough language editing and proofreading are required.

19. ENSURE ALL TABLES. FIGURES, TEXT AND REFERENCES ALSO FULL PAPER WITH IJAR FORMAT

Reviewer Decision: Major Revision

The manuscript may be reconsidered after the authors satisfactorily address the major technical and methodological concerns raised above.
